## EDUCATION

**Instituto Remedios Escalada**

SYSTEMS ANALYST

- Thesis project: Web application for Josecito Gas S.R.L

**IICANA**

ACELERATED COURSE – 2019

- Intermediate level of English
- The third highest average in English

## PROFESSIONAL PROFILE

I am a versatile and highly motivated web developer with experience in developing web applications and microservices-based systems. With a comprehensive and multidisciplinary approach, I specialize in creating robust and scalable digital solutions using a variety of frontend and backend technologies.

## WORK EXPERIENCE

### Backend Developer - Postcron

OCTOBER 2021 – PRESENT

- Designed and developed a scalable microservices architecture using NestJS.
- Configured RabbitMQ for asynchronous communication between microservices.
- Managed Kubernetes for orchestrating and deploying microservices in a production environment.
- Implemented background job queues using Redis to efficiently process intensive tasks.
- Configured workers to handle tasks such as data processing, automated post publishing, email delivery, and report generation, enhancing system performance and responsiveness.
- Integrated third-party APIs such as Facebook, LinkedIn, Stripe, OpenAI, and others to enhance system functionality and deliver greater value to platform users.
- Updated and maintained an existing Angular web application, implementing new features and performance improvements.
- Designed and developed the Postcron mobile app with Flutter, incorporating push notifications, social media integration, and content management, and handled its publication on the App Store and Play Store.

## TECHNICAL SKILLS

- Extensive experience in frontend development using Angular, as well as in implementing RESTful APIs to communicate with backend services.
- Competence in backend development using Node.js and Express, as well as in integrating SQL databases.
- Basic knowledge in how implementing microservices architectures, using tools like Docker and Kubernetes.
- Familiarity with agile development methodologies like Scrum and Kanban, as well as with version control tools like Git.
